

U.S. Fact Sheet

United States Overview

The U.S. West and U.S. East are Hawai'i's two largest source markets for visitors. The U.S. West market includes visitors who travel to Hawai'i from the 12 states west of the Rockies, and the U.S. East includes all other states. The Hawai'i Tourism United States (HTUSA) COVID-19 recovery plan continues to focus on welcoming visitors who want to *mālama* (take care of) Hawai'i during their visit, with an emphasis on providing education pre-arrival through messages that resonates with them throughout their stay. HTUSA will promote the Kuleana and Mālama Hawai'i campaigns, working with visitor industry partners to encourage visitors to stay in a regenerative way – to take the time to really know the islands, form a deeper connection with Hawai'i's culture and people, and travel while giving back mindfully. These efforts can be seen in messaging throughout Hawai'i's airports for how to visit responsibly and respectfully, and even on Social Media platforms and navigation apps, like Waze, for new reservation systems at some of our frequented destinations on-island.

Market Conditions

- Real gross domestic product (GDP) grew 2.8 percent in the third quarter of 2024, led by strong growth of consumer spending. Sharp increases in government and business spending also boosted growth.
- The Conference Board Consumer Confidence Index increased in October 2024 to 108.7, up from 99.2 in September. The Present Situation Index—based on consumers' assessment of current business and labor market conditions—increased by 14.2 points to 138.0. The Expectations Index—based on consumers' short-term outlook for income, business, and labor market conditions—increased by 6.3 points to 89.1, well above the threshold of 80, which usually signals a recession ahead.
- According to Future Partners, anticipated annual travel budgets soar to another record high as Americans plan to increase their trip volume over the next year. When it comes to the upcoming holidays, more than 40 percent of American travelers have trips specifically planned for those times. Despite being a national election year, it does not appear that politics will pose a widespread challenge to family holiday time. Travel spending attitudes hold steady in 2024, with minimal fluctuations month over month. In this most recent wave of The State of the American Traveler, 34.7 percent of American travelers said that now is a good or very good time to spend on travel, a slight (-0.4%) dip compared to the previous month, but an increase of +6.6 percentage points above the same time last year. One indicator of a positive shift coming out of all this stability: this month's maximum anticipated 12-month leisure travel spend reached another record-breaking \$5,734, outpacing last month's record of \$5,413, suggesting strong leisure travel spending intent for 2025.
- The forecast for domestic scheduled nonstop air seats to Hawai'i during this period will be up 6.9 percent compared to the same period in 2023/24. This projection is based on flights appearing in Diio Mi. An increase in seats is expected from U.S. West (+5.9%) with a large increase from the U.S. East (+14.1%). The growth in the East is due to the new Delta HNL-BOS flight starting in November and resumption of seasonal Delta service from ATL-OGG, ORD-KOA, ORD-OGG, and additional frequencies to existing markets.
